

EXPERIENCE

Luminate Web Solutions

NOV-2025 - PRESENT

Junior Full Stack Developer (Backend-Focused) | Team Lead

- Develop and maintain ERP systems, Learning Management Systems (LMS), business websites, and admin panels from planning to production.
- Design scalable backend architecture, business logic, REST APIs, and MySQL database schemas for enterprise applications.
- Collaborate directly with clients to understand requirements, propose technical solutions, and deliver projects that meet business goals.
- Lead a small development team by assigning frontend tasks, reviewing code, and mentoring junior developers throughout the development process.
- Define project workflows, coordinate development activities, and ensure timely delivery following best development practices.
- Deploy and maintain applications in production, troubleshoot issues, and optimize application performance and reliability.

SKILLS

- JavaScript (ES6+), Python (Basic), React.js, Next.js, Tailwind CSS, Node.js, Express.js, MySQL, Sequelize
- Git, GitHub, Postman, Google Sheets, Excel, WordPress, Google Colab, VS Code, Antigravity, GitHub Copilot
- Leadership, Problem Solving, Team Management, Team Collaboration, Communication, Time Management

Languages: English, Hindi, Telugu

EDUCATION

BACHELORS OF ENGINEERING IN (CSE)

Osmania university

India, Telangana, Hyderabad

2021 – 2025

SELECTED PROJECT

1. ERP System Development | <https://bimqubator.com>

Developed collaboratively with a team

 - Leading the end-to-end development of an internal ERP system, owning the complete technical lifecycle from requirement analysis to implementation.
 - Developed and maintained RESTful APIs for multiple ERP modules using Node.js, Express.js, and MySQL.
 - Designed database schemas, relationships, and optimized SQL queries using Sequelize ORM.
 - Implemented JWT-based authentication and Role-BasedAccessControl (RBAC) for secure access management.
 - Built scalable backend architecture, business logic, and integrated frontend with backend services.
 - Collaborated with the team on system design, code reviews, and production deployment.
2. Institute Management System | <https://sdhubqutubshahi.com>

Designed and developed independently from frontend to backend.

 - Built the complete Learning Management System (LMS) from scratch, including frontend, backend, database, and admin panel.
 - Designed scalable RESTful APIs, database architecture, and business workflows using React.js, Node.js, Express.js, and MySQL.
 - Implemented JWT authentication, RBAC, and secure user management for Students, Trainers, Admins, and Directors.
 - Developed modules for student management, trainer management, attendance, assessments, payroll, certificates, and reporting dashboards.
 - Managed end-to-end development, deployment, maintenance, and continuous feature enhancements.
